# Style Guide

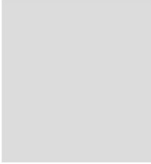

This guide will provide the guidelines of how the website will be designed:

## Logo

The title will have an underline running underneath it, and a hat plus a mannequin with a suit on either side of ht

## Color

The following colors will be utilized:

	R: 112 G: 128 B: 144 Hex#: 708090
	R: 220 G: 220 B: 220 Hex#: dcdcdc
	R: 128 G: 128 B: 128 Hex#: Hex#: 808080
	R: 169 G: 169 B: 169 Hex#: a9a9a9

# Image Sizes

Icon images, such as the interview image boxes, will remain in a (size) x (size) square  
Icon images are to not be stretched in any way.

Background images will have a longer size, covering either between (size x) wide to (size x) wide.  
The height of the image backgrounds will be between (size y) height to (size y) height.  
When using these images, have the element repeat the image in all directions.

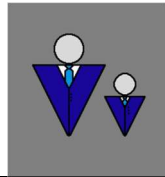

Background images must have a consistent flow, meaning that there cannot be a visible section or line where the repeat begins

## Minimum Image Size

For images to be presentable, icon images must be at least 125 px x 125 px

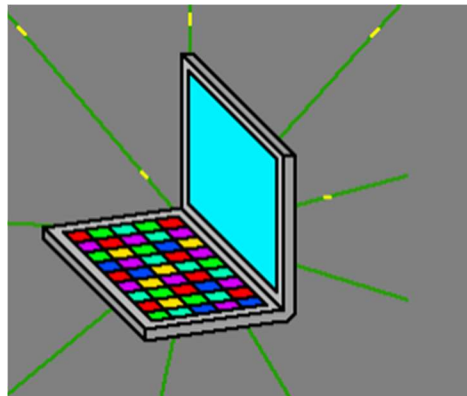

From there, the height and width of the icon can increase simultaneously depending on the screen size.

## Minimum Clear Space

For the logo, a small amount of spacing is needed to present the website logo.

Spacing needed: 50px x 50px

For Icons, no spacing is needed, as the figure boxes will contain the images.

For background Images, the element itself will not need any spacing, as the creation of the image will have spaces placed in the actual image.

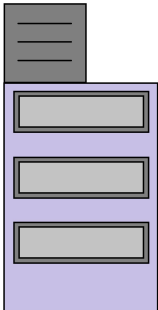

## Navigation Link Designs

For navigational links, there will be a specific design to them.

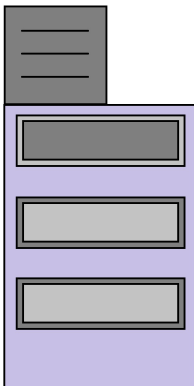

For each page, an icon box will be in the top left corner.

When clicked, it will reveal all navigational links, including the name of the section.

When hovering, the navigational link will highlight

When clicked, the link will reveal a click color and transport the user to the designated page.
